### **Cilji in kompetence:**

Študenti bodo dobili obsežno teoretično podlago za razumevanje makroekonomskih pojavov in spoznali praktične posledice posameznih makroekonomskih teorij na celotnogospodarska gibanja in gibanja posameznih celotnogospodarskih sektorjev. Spoznali bodo razvojno pot posameznih teorij, okoliščine, ki so vplivale na njihovo oblikovanje in vpliv, ki so ga imele oziroma ga imajo.

### **Objectives and competences:**

Students will acquire a broad theoretical basis for understanding macroeconomic events and gain knowledge of the practical impact of specific macroeconomic theories on whole economics trends and whole economics sectors. They will gain knowledge on the development of specific theories, circumstances which affected their design, and their past or current impact.

### **Predvideni študijski rezultati:**

**Znanje in razumevanje:**  
 Študent bo pridobil poglobljena znanja s področja makroekonomske teorije. Spoznal bo, da je za resno raziskovalno delo potrebna teoretična podlaga, ki jo lahko uporabi pri vseh raziskovalnih nalogah in pri izdelavi doktorske naloge.

Študent bo razumel teoretične koncepte in orodja znanstveno-raziskovalnega dela, jih znal uporabiti v raziskovanju in rezultate korektno predstaviti v pisni in ustni obliki, kakor tudi poiskati ustrezno teoretično utemeljitev kot izhodišče za razreševanje posameznih problemov.

Študent bo znal povezati teorijo z iskanjem odgovorov na vprašanja stvarnega gospodarskega življenja oziroma stvarne ekonomske politike.

### **Intended learning outcomes:**

**Knowledge and understanding:**  
 Students will acquire in-depth knowledge in the field of macroeconomic theory. They will become aware that serious research requires a solid theoretical basis which can be applied in all research assignments and in the production of the doctoral thesis.

Students will understand the basic theoretical concepts and tools of scientific research, including knowledge on how to apply them in research; how to properly present the results in writing or orally; and how to find relevant theoretical grounds as the starting point for resolution of specific problems.

Furthermore, students will know how to link theory with the searching for answers to issues from the material economic life and/or material economic policy.

### **Metode poučevanja in učenja:**
